

Premium Surface **PROTECTION**

Protecting the Beauty, Colour & Life of Your Furnishings
STAIN, MOULD, WEAR AND SUN-FADE PROTECTION

Manufacturer, Distributer and Exporter

MISSION STATEMENT

Premium Surface Protection delivers technologically advanced and environmentally safe solutions for textile and furniture protection.

We manufacture non-toxic products that are tested by independent laboratories and carry the WoolSafe, CleanSeal and EnviroSeal Certification.

With a strong commitment to customer service, we distribute and export our products worldwide.

We also partner with OEMs and wholesalers to ensure consumers have access to our textile and furniture protection solutions.

Australian Trusted Trader Accreditation

Premium Surface Protection is accredited by the Australian Border Force as an Australian Trusted Trader.

An Australian Trusted Trader (ATT) is part of the Authorised Economic Operators (AEO) network.

Governed by the World Customs Organization, the AEO network is internationally recognised, operating in more than 96 countries. It facilitates cooperation between industry and government by strengthening supply chain security and legitimate trade.

To obtain this ATT accreditation, Premium Surface Protection needed to prove its superior trade compliance and supply chain security.

As an Australian Trusted Trader, Premium Surface Protection ensures the import and export process is expediated between all trade channels, including our manufacturing facilities and our client's OEM factories.

With minimised barriers to trade, we can ensure business flows efficiently, allowing increased commercial viability for all stakeholders.

Premium Surface Protection Company

Providing the world's most technologically advanced and environmentally friendly textile and furniture protection, thoroughly tested in laboratories, holding certification for their efficacy and value.

Premium Surface Protection (PSP) proudly manufacture and distribute products that are your best insurance against everyday mishaps, whether they be in the home, hotel, office, car, boat or plane.

PSP products are designed to enhance and prolong the life of furnishings, by using nanotechnology to protect fabric at a molecular level whilst maintaining fibre integrity. PSP manufacture products that support environmental sustainability with a strong focus on lowering environmental impact.

PSP's effective fibre protection systems are designed to help keep fibres clean and stain free to maintain their original beauty and intensity of colour for longer.

Designed and tested in Australia for global markets for residential and commercial applications

COMMERCIAL | HOSPITALITY | RESIDENTIAL | MARINE | AERO | AUTO

PSP PRODUCTS: THE MOST TECHNICALLY ADVANCED AND EFFECTIVE FIBRE PROTECTION SYSTEM AVAILABLE.

Long term protection against oil & water based stains

Has high degree of permanency

Protection against the sun's UV, A & B rays

Reduces UVA and UVB sun fade considerably

Effective on all types of fabric, rugs & carpet

Wool, cotton, silk, synthetic fibres, suede & leather

Nanotechnology

Will not alter the colour, texture or feel of the fabric

Penetrates & seals fibres

Not a coater

Can be applied to new and used furnishings

Ideal to treat after cleaning

Non-toxic & non allergenic PFOS & PFOA free, zero VOCs

Anti-static

Provides enhanced customer comfort

Extends fabric life

Strengthens fibres & creates wear integrity

Product validation

Tested by independent laboratories

Retards flames & fumes

Fights against mould, mildew & bacteria

Protecting the beauty, colour and life of your furnishings needs to come with peace of mind that you have chosen the best fabric protection possible.

PSP Endorsed Fabric Protection

Other Fabric Protection Products

PSP products create an invisible shield against oil and water-based stain causing liquids and soil types. It even provides a reduction in damage causing UV exposure.

STAIN PROTECTION

Other protection products provide a basic level of protection from some oil and water-based liquids. Few protection products have any UV protection qualities at all.

PSP's product formulas are based on nanotechnology creating a penetrating bond. Although no protection product will last forever, PSP products will provide superior protecting performance for many years and will survive many professional cleanings.

LONG LIFE

Traditional surface barrier protection products can be removed easily by normal wear and professional cleanings. These topical treatments will need reapplication every 6 to 12 months or after professional or DIY cleanings.

PSP's formulas contain no harmful PFOA or PFOS Ingredients. They are the only protection product in the world to earn the EnviroSeal® certification. EnviroSeal is an evaluation and certification for environmentally responsible maintenance products suitable for use on carpets, rugs and furnishing fabrics.

NON-TOXIC

Other protection products utilize outdated, harmful chemicals that contain PFOA and PFOS which have been shown to be extremely persistent, both in the environment and in human tissue. Recent studies have linked these chemicals to serious damage to the immune systems in children.

PSP products reduce surface tension. This prevents damage causing particles from attaching to fibers and reduces fiber to fiber contact which leads to fiber wear.

FIBER WEAR

Other protection products provide time limited protection and will need more frequent reapplications for long term performance. Every 6 to 12 months or after professional or DIY cleanings.

Tested and Proven

PSP endorsed products are tested annually by The WoolSafe® Organisation. They are tested on natural and synthetic fibre compositions, confirming products are environmentally responsible and suitable for the care and maintenance of carpets, rugs and furnishing fabrics.

Our products are CleanSeal Approved, WoolSafe Approved and EnviroSeal Certified.

Why accredited product testing is important.

“

We engaged Premium Surface Protection to protect the new fit outs of soft furnishings, rugs and carpets in a number of our new developments over the past few years...

The Fiber Protector is very effective; spills and stains are very easy to clean ourselves and the furnishings have kept a great appearance.

We are glad to have made the decision to protect our soft furniture assets and highly recommend their services.

Aveo Senior Development Manager*

Frequently Asked Questions

How soon after protecting can items be used?

Items can be used 4 hours after application.

Do any of the products have an odour?

Yes, there is an odour during application that is not detectable once cured. We recommend that you are not in the room during treatment as it is applied as a fine mist spray.

How do PSP products help furnishings resist wear and abrasion?

Treated fibres are up to 60% more resistant to wear and abrasion because soil must wear off the protection before causing wear on the fibres. Similarly, fabric fibres must wear off the protective penetrator before they can wear on each other. This “wear resistance” promotes longer fabric life and less frequent replacement.

How do PSP products help to prevent the growth of bacteria, fungus and mould?

FiberProTector and MicroSeal are built with nanotech particles which have the lowest friction of any known material. They create an invisible shield around each fibre, providing an effective barrier against organic fluids, soil and dust.

The unique and proprietary systems are engineered to be bacterially static to resist the growth and spread of pathogens, mould and mildew. This is of particular value for individuals with allergies and asthma when subjected to recycled air.

Do PSP products effect the look and feel of textiles once treated?

No, they will not effect the colour, texture or feel of any type of fabric. If accidentally over sprayed on wood, glass, tile or metal, it will not damage the finish and is easily wiped away. Additionally no products in the PSP suite promote fibre shrinkage.

Why Premium Surface Protection Company?

TO KEEP THE NEW LOOK!

PSP endorsed products ensure a longer life and extended beauty for expensive assets.

Treatments will reduce maintenance costs and promote sustainability. They will protect your new interior installations from spills, stains, fading, static, bacteria, wear and abrasion.

PSP Products are your best insurance against everyday mishaps and general wear and tear.
